Obiettivo

Capire i modelli di data economy

A fine della sessione capirete che

- gli Open Data sono utili allo sviluppo
- Avere dati ma non idee ma aiuta
- Servono dati di qualità per creare sviluppo economico

Open data is fuel for innovators. It has the potential to generate more than [\\$3 trillion a year](#) in additional value in sectors including finance, consumer products, health, energy and education, according to a recent study. These are just a few examples of companies leveraging open data. While we don't endorse companies, we're always interested in new examples: [Share them on Twitter](#).

2013, anno degli OpenGeoData? L'entusiasmo (mio) è calante

19 marzo, 2013 | di [Andrea Borruso](#) in » Dati

Il 23 febbraio sono stato a Roma alla prima conferenza organizzata dall'associazione [OpenGeoData Italia](#). Ne sono stato – per conto di **TANTO** – uno dei relatori e sono contento di aver partecipato. Le ragioni sono diverse e ne voglio elencare solo alcune:

Categorie

Chi è Giancarlo?

Un calcolo per i dati aperti

il nostro calcolo ruota intorno ad una semplice equazione:

$$P \times B + D > C$$

dove

- P è la probabilità che l'apertura dei dati avrà qualche effetto,
- B è il beneficio che il dataset in questione può ricevere dall'apertura,
- D è l'impatto globale o di ecosistema, e
- C è il costo.

Qualsiasi aumento di P, B o D ed una diminuzione di C faranno in modo che l'apertura dei dati porterà a maggiori benefici.

Intervista ai partecipanti: Quale è la carenza principale che trovi negli open data?

D = dovere (impatto ecosistema)

B = Benefici

P = Probabilità

C = Costi
