Welcome to the Sandy Funding Tracker

This site tracks New York City's response to Hurricane Sandy. The disaster caused more than \$19 billion in damage to critical infrastructure systems, and destroyed or seriously impacted thousands of homes and businesses.

To accelerate recovery, the de Blasio Administration has overhauled key programs to streamline relief efforts and improve coordination across city agencies.

Welcome to Water Point Mapping System (WPMS) Tanzania

These are initiatives of the Government of Tanzania through Mapping System (WPMS) Tanzania Official Website being a basis of better service delivery.

On the other hand, **Water Point Mapping System** is an integrated process and users dedicated to collecting, storing, processing, and analyzing water point data, providing feedback for public use. Water Point Mapping System supports water sector performance at local and national levels.

Water Point Mapping (WPM) helps in monitoring the distribution of water points, the planning of investments to improve water supply coverage, and the monitoring of water quality issues of equity and functionality at district level.

WPM supports the process of establishing a baseline of water performance monitoring (SPM). As such WPM activities can be used to develop programmes to engage with and influence sector dialogue to improve water services at local, national and regional levels.
